North American Stone Company has been designing, producing and delivering quality Architectural Cast Stone products, Shiloh Ridge Stone veneer, and related products and services throughout the United States since 1997. Our products are designed to enhance not only the aesthetic value of the structure, but also gives the General Contractor and Mason the ability to have a faster turn around time by eliminating the time it takes to shape and cut natural stone.

Our main approach is more than a problem solving approach, is a problem preventing approach. At NASC we take every necessary precaution to deliver a product, not only of extraordinary quality, but also, that correctly fits into a pre-existing structure. We understand that Cast Stone is the only product involved in a construction project that is required to fit prior to installation. We do everything necessary to obtain the required information to produce quality architectural cast stone components that fits.

Throughout the pages of this catalog, you will find a wide variety of products that are designed to accommodate different architectural styles. In addition, our designers have the capability to interpret your particular ideas and design custom elements that are unique to your taste and imagination.

From planters, medallions and corbels, to elaborated entry systems and custom designed fireplace mantels; North American Stone Company delivers quality Architectural Cast Stone and Manufactured Stone Veneer products that will endure far beyond the test of time. Our commitment to provide outstanding customer service will complete the experience of working with North American Stone Company. Experience the Solution!

Fresh
OUT OF THE MOLD

[Images of architectural cast stone designs and installations]
Every effort has been taken to accurately reproduce the cast stone colors, however, differences may exist with the actual product colors. Please request color samples from our representative.

Custom textures and colors are available. Please ask for details.
Whenever possible, please provide field measurements of all windows included in your project. The windows in your project may differ from the diagrams included in this catalog. These illustrations are intended only to provide a general idea of the measurements needed.
MEASUREMENTS

Always review the floor plan and take note of any special conditions that may interfere with the installations of the cast stone surround.

Please refer to the floor plan detailing the entry in order to determine the width (horizontal opening) specified for the entryway. This horizontal dimension may be different from the horizontal opening of the framing.

Verify that there is adequate space for the overall height and width of the selected entry.

Measuring elliptical windows is difficult and requires precision. If possible create a template of the window by tracing the perimeter over paper (butcher paper) or cut it out in a piece of cardboard.

Whenever possible, please provide field measurements of all windows included in your project. The windows in your project may differ from the diagrams included in this catalog. These illustrations are intended only to provide a general idea of the measurements needed.

Placing an Order

Our pledge “Experience the Solution” exemplifies what we are capable of doing to make the process as simple as possible for you. Just send us what you have.

If you have a set of construction documents (set of plans), then that will do. If not, send us what you have. Perhaps you are involved in the restoration of an historical building that is older than paper, send us your sketches, photographs or hand drawings. We’ll work from there.

Generally that’s all we need to provide you with a preliminary consultation and estimate. If we have questions, we’ll contact you. Remember: Accurate dimensions are the key for accurate estimates.

How to send us your documents

Email is faster, economical and often easier. Send us CAD files, sketches and photos in almost any format. We’ll reply with a confirmation and a few questions to clarify the scope of the project, shortly after, you’ll receive our proposal. NASC submits detailed, itemized proposals. The proposal will allow you to have a clear idea of what’s included in the project. In many cases, we provide alternative proposals as recommendations or as suitable replacements.

For additional information regarding our entire line of products, services, and highly skilled installers, please contact us at 972-562-9992 or email us at info@northamericanstone.com You may also visit us on the internet at www.northamericanstone.com

Please email plans for estimating to plans@northamericanstone.com
In most cases, our estimating department can perform your estimate within 48 hours, whether you are hard bidding or simply establishing a budget.
